Winner! Winner!

You Just Won
A
Free Snack!
1 in 100 Wins!

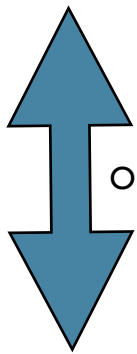

We wanted to bring some fun back into vending
(after all, this is what we do!).

So we decided to program our Snack Vending Machines to
give away 1 in 100 snacks, FREE!

Here is how it works:

1. We program the motherboard of your snack machine to use it's vend number generator
2. When a customer purchases a product, the machine will select 1 in 100 customers to win a free snack!
3. If selected, the machine will "Beep" several times and flash "WINNER" on it's digital LED as it dispenses their snack of choice.
4. The customer can then select another snack, or press coin return and receive a refund for the snack the just received.
5. What makes this feature so great is everyone loves to win something, and you can be having a rough day at work, and winning something out of the vending machine just makes the day a little better.

Our People, Taking Care of Your People

- * Better Concept
- * Better Creativity
- * Better Execution
- * Better Vending
